Protect Your Clients From Their Water

Hard Water Facts:

1. Showerheads on hard water lost 75% of flow rate in less than 18 months
2. Tankless water heaters failed after only 1.6 years on hard water. On soft water they maintained original factory rating
3. Gas water heaters are up to 24% more cost efficient on soft water
4. Electric water heaters can accumulate as much as 30 lbs of rock shortening the life of the heating element
5. You can use 50% less soap and detergent with soft water. Hard water makes soap work harder
